

REVOLUTIONIZING THE CONSTRUCTION INDUSTRY

## WHAT IS TECHNO METAL POST?

Techno Metal Post simplifies life by providing an alternative foundation solution, that can be installed in most soil conditions. Our product is a helical pile, that is screwed into the ground until it reaches the appropriate load-bearing capacity to support all types of structures. Our piles are installed by our team of certified professionals, using machines specially designed for pile installation. What's more, our unique and exclusive green sleeve slides along the pile in response to ground movements, ensuring its stability during freeze and thaw cycles.

« I've installed the helical piles on many of my shows and I just recently installed them in my own home. Great experience, great team and a great product. »

TECHNO METAL POST  
**THE ADVANTAGES**

**STRONG, SOLID, AND DURABLE**

No matter what challenges you face when planning or building your project's foundation, Techno Metal Post's helical piles are your solution. Compression, uplift or lateral loading, our engineering department will propose the right piles for your project. Afterwards, our team of certified professionals will be able to install the solid and stable foundation you were looking for.

**NO EXCAVATION**

Installing Techno Metal Post's helical piles requires no excavation or backfilling. The installation is carried out with minimal impact on your property, reducing clean-up and landscaping restoration costs.

**IN-HOUSE ENGINEERING SERVICE**

After analyzing your project, our engineering department will suggest the most suitable solution for your needs. In addition, our engineers will ensure the installation of your foundation complies with all municipal/city regulations.
