TINY HOUSES

TECHNO METAL POST

TINY HOUSES

A growing trend is the well admired “Tiny House”. In many circles, Tiny House typically refers to a small home or trailer with wheels and axles that can be moved from one location to another.

While there is great debate as to what does or doesn’t constitute a Tiny House, the 2017 International Code Council’s (ICC) official definition doesn’t limit it to wheels, and can therefore include a foundation. (Note: A Tiny House is not an ADU). Techno Metal Post’s helical piles are the perfect solution for a solid foundation year-round, thanks to our exclusive green sleeve, which prevents the pile from moving during frost/thaw cycles.

Our installation process is effective, quick, reliable and has a low footprint due to our specialized and compact machinery. And as with Manufactured Homes, the piles can be removed and relocated.

ADVANTAGES

**SIMPLE
AND QUICK**

**NO EXCAVATION
AND LOW FOOTPRINT**

**EFFICIENT
AND AFFORDABLE**
